Especially nowadays a strong „pro-European awakening“ is needed to react to the rise of anti-EU populism. The European community currently undergoes a new dynamic impulsed by the new French-German leadership for a „re-foundation of Europe“. Accordingly, the impulses for a realignment of Europe exerted by the regions shall gain a stronger recognition. More than ever, citizens are called upon to make their own contribution. "Citizens' dialogue" is the order of the day.

Artists' colonies as an art historical phenomenon, which produced about 180 artists' colonies across Europe could be an important source of inspiration. In the last 150 years important art movements emerged, new ways of thinking arose there. International experts will explain how artists' colonies can once again act as thought leaders of their time. Real-life examples of the „Weimar triangle“ connection (Germany, France and Poland) will be showing how cultural cooperation across borders emphasizes the connective rather than the divisiveness. Common European heritage as identity-forming factor.

We would like to ask you for registration to the opening ceremony by April 6th via e-mail: sekretariat@mnkd.pl
